Phone          667 218 136

Address       calle Espartero, 23, 3º, Ferrol, A Coruña, Spain

## Professional Profile

Architect with great interests in many in the fields involved in the discipline, including from ideas regarding urbanism, communication through graphical means, and aspects related closely with the technical elements in the construction process, among others. I take great pleasure in learning about new means and tools which help in the further development of these series of tasks around the architectural process.

It is because of this that I look towards focusing my efforts and professional life around the further harnessing of the tools that help in the coordinated development of the different activities revolving around the architectural practice. Among these tools, BIM and BIM methodologies of project management play a central and important role.

## Academic Training

Degree in Architectural Studies - Universidad de A Coruña  
Sept. 2015 - Jul. 2022

SICUE Student Exchange - Universidad Politécnica de Valencia  
Sept. 2019 - Jul. 2020
